Date Added: 22/06/2005 Version: 1.1 Price: Free Size: 5.7MBQ: Question regarding categorical statements about finite dimensional vector spaces and $\mathbb{R}$-vector spaces. In the infinite dimensional vector space $V$ is $\dim V = \infty$, then the set $W = \mathbb{R} \times V$ has the same cardinality as $V$? My intuition is yes, but I am not sure. A: If $V$ is an infinite dimensional vector space, then $\mathbb{R}\times V$ is an infinite dimensional vector space, hence has the same cardinality as $V$. Q: PHP GD image masking functionality I'm writing a PHP script to resize and crop a photo, however, I'd also like to mask out the parts of the photo that I do not want to show (there are white circles in the image below and I want to crop around them). I'm not sure if this is possible with the GD library or if I'll have to use something like the ImageMagick library. Here's the code that I'm using to resize and crop the photo: $image_p = imagecreatefromjpeg("wp-admin/images/login.jpg"); $resize = 900; $crop = 500; $image_p_w = imagesx($image_p); $image_p_h = imagesy($image_p); // Resize $width = $image_p_w / $resize; $height = $image_p_h / $resize; // Crop $w = $image_p 1d6a3396d6

Flamingcat 7.0.1.0.0 18 January 2010 A simple but very attractive screensaver. If you'd like a screen saver with a pretty picture, but not necessarily a slideshow, you'd probably enjoy this one. It comes with several options, including an option to "Prevent the screen saver from starting on startup." I could never find that option (nor have I ever seen a startup screensaver on my Windows 7 PC), but I do think that is a useful option for some people.
