Nationally, California communities and police chiefs often use the concept of "implied consent" to argue that drivers who refuse field sobriety tests must face the consequences of a DUI arrest. But, the reality is there is no implied consent law in California. And, in more than a dozen counties, no police officer can require a motorist to submit to a sobriety test. Opponents of sobriety checkpoints say this results in officers stopping many more motorists per shift than they would if the checkpoint were not in place. The O.C. has long been a hotbed for the sobriety checkpoint debate. According to data from the California Highway Patrol, O.C. police have conducted 65 sobriety checkpoints since January 2007, the first full year the CHP began collecting such data. The vast majority of the checkpoints – 48 of them – were conducted in 2008 and 2009. But the number of checkpoints has declined steadily in recent years. While they are still common in O.C. today, they have been significantly reduced from the peak in 2007. The rest of the so-called "red-light" district checkpoints were located in Kern, Los Angeles, Santa Barbara and Ventura counties. O.C. police Lt. Tom Smith, who is in charge of the CHP's O.C. Field Operations Bureau, said that

What's New in the AutoCAD?

Point-by-Point Annotations: Make your own unique annotations and call them out directly with your mouse. You can place them on a point, an object, or an object's surface. Dragging-and-dropping on the canvas: Drag and drop any part of the document, for example, a drawing, photo, or drawing layer, into an editable region of your drawing. It's easy to rearrange objects and layer them together. Dynamic Calendars and Lists: Organize your projects and information into a dynamic calendar or list. It's great for school or work projects and those long-running maintenance and service projects. Simplified Drawing Creation: Manipulate drawing objects using the familiar WM_COPY, WM_DRAW, and WM_ERASE commands. Even with these familiar commands, it's easier to work in AutoCAD. Next in my list of new features for AutoCAD 2023 are: Dynamic Guides: Inserts and deletes dynamic guides. With dynamic guides, your drawing can be rearranged and repositioned with no loss of precision. (video: 1:24 min.) Dynamic Placement: Controls the placement of parts and layers using dynamic guides. (video: 1:32 min.) On-screen Wizards: This tool is already available in AutoCAD LT 2020. AutoCAD 2023 will include on-screen wizards for some common commands. AutoCAD Exchange: This tool will support the addition of Exchange objects from other vendors, including others from Autodesk. AutoCAD History: This new tool will help you easily identify which commands are used most frequently. New Feature: Render Support for Shared Files: Render the scene to a file, allowing you to create a saved drawing from the wireframe. You can then insert the file into the drawing or print it to a PDF file. This is available in Autodesk Design Review 2020 and AutoCAD 2023. Update: If you're on AutoCAD LT 20.3, you can install AutoCAD LT 2020, which includes many of these features. AutoCAD 2023 will release October 2, 2019 and will be available as a free update or as a standalone for \$
