

Does anyone know how to fix the multiplayer connection problem. All my other online features in games work. But hoi4 just won't work. I played the game with my friend using the same connection and everything worked for him. When I want to connect to the game it says the connection could not be established and I can't even launch the game. Even when I disable the firewall, I still cannot connect. When I go to settings I don't have a choice to turn on the firewall because I'm already on. How can I fix this? This is for online games only. When I play LAN games, it works fine.
