Another view of the flat top. Gameplay In the alternate universe you are a pilot of a "super car". This is how it works: You start by driving with the wheel of a super car. The car is automatic and has a human driver. Then you (it is really a computer controlled driver) win a car in a car contest by driving it for 400 km. Your car is completely unlocked. After a lot of configuration (the keyboard settings and such) you start. It is OK to wait for the AI to do his job. You have to start your car in the garage of a car club, which is where the very first car was parked. You find it in a mountain town. Next to it is a sign for the first car club. With your car you can reach most parts of the city, so you can earn money with all kinds of jobs: delivering various goods, try your luck in crazy death racers, enlist in the army, or join the earth's superhero team.* The controls are based on physics.* Various locations: from a mountain town to human entrails.* Tuning! Pimp Your Ride!*Wonderful soundtrack by indie musician Aink (feat. Mads Bolding). Now, your next goal is to advance in the car club. "The Raid" gives you a limited time, to beat a certain car in a race. "A Flight" is the most difficult challenge: perform a constant speed for 40 minutes. You can win medals and prize money for various competitions. A real challenge is to get the overall prize for each one. The overall prize money is indicated in the game. A demo version of the game.
