Watch Slumdog Millionaire Hindi.Q: How to update a data entry in firebase from a realtime listener, I have been working on firebase realtime chat for few days. in that, I am facing a problem with a view. I have implemented basic chat on firebase, but when a new message comes into the view, it will not update unless I refresh the page. How do I refresh the data entry in firebase such that it will reflect the change in the view? I have implemented the following code:

```
var ref = new Firebase(""); ref.on("child_added", function(snapshot) {
```

```
$scope.messages.push(snapshot.val());  
$scope.currentMessage = snapshot.val();  
});
```

A: There are two main options. A) use the iOS simulator to send a push notification and refresh the data locally. B) Push your data and listen on a different location, for example a different path of the data or even a completely different location. The main 6d1f23a050
